

ANDROID APP · DESIGN REVIEW

UI/UX, wireframes & screens

Every screen of Connectoo, an unofficial Android client for the Icebreaker network (independent project, not affiliated with Icebreaker Connect, Inc.): how it's laid out, how it looks, and what each part does, for review and approval before the full build.

Build	v1.1.0 (unofficial Android client)
Platform	Android phones first; tablets & Chromebooks supported by the same layout
Date	6 October 2026
Status	v1.1.0 released · portfolio copy

What this document covers

Purpose

Get approval on the app's structure, look and behaviour before building the remaining features and the release version.

What's inside

- Navigation map and key user flows
- Design system (colours, type, components)
- 17 screens: wireframe + screenshot + functionality
- Loading, error, empty and offline states
- Dark mode, tablet and Chromebook layouts
- Scope, known issues and sign-off

How to read a screen page

1. **Wireframe** (left): the layout in grey boxes. Orange numbers mark the key elements.
2. **Screenshot** (middle): the same screen as the app renders it, in an Android phone frame.
3. **Functionality** (right): what each numbered element does, where the data comes from, where it navigates, and which states it handles.

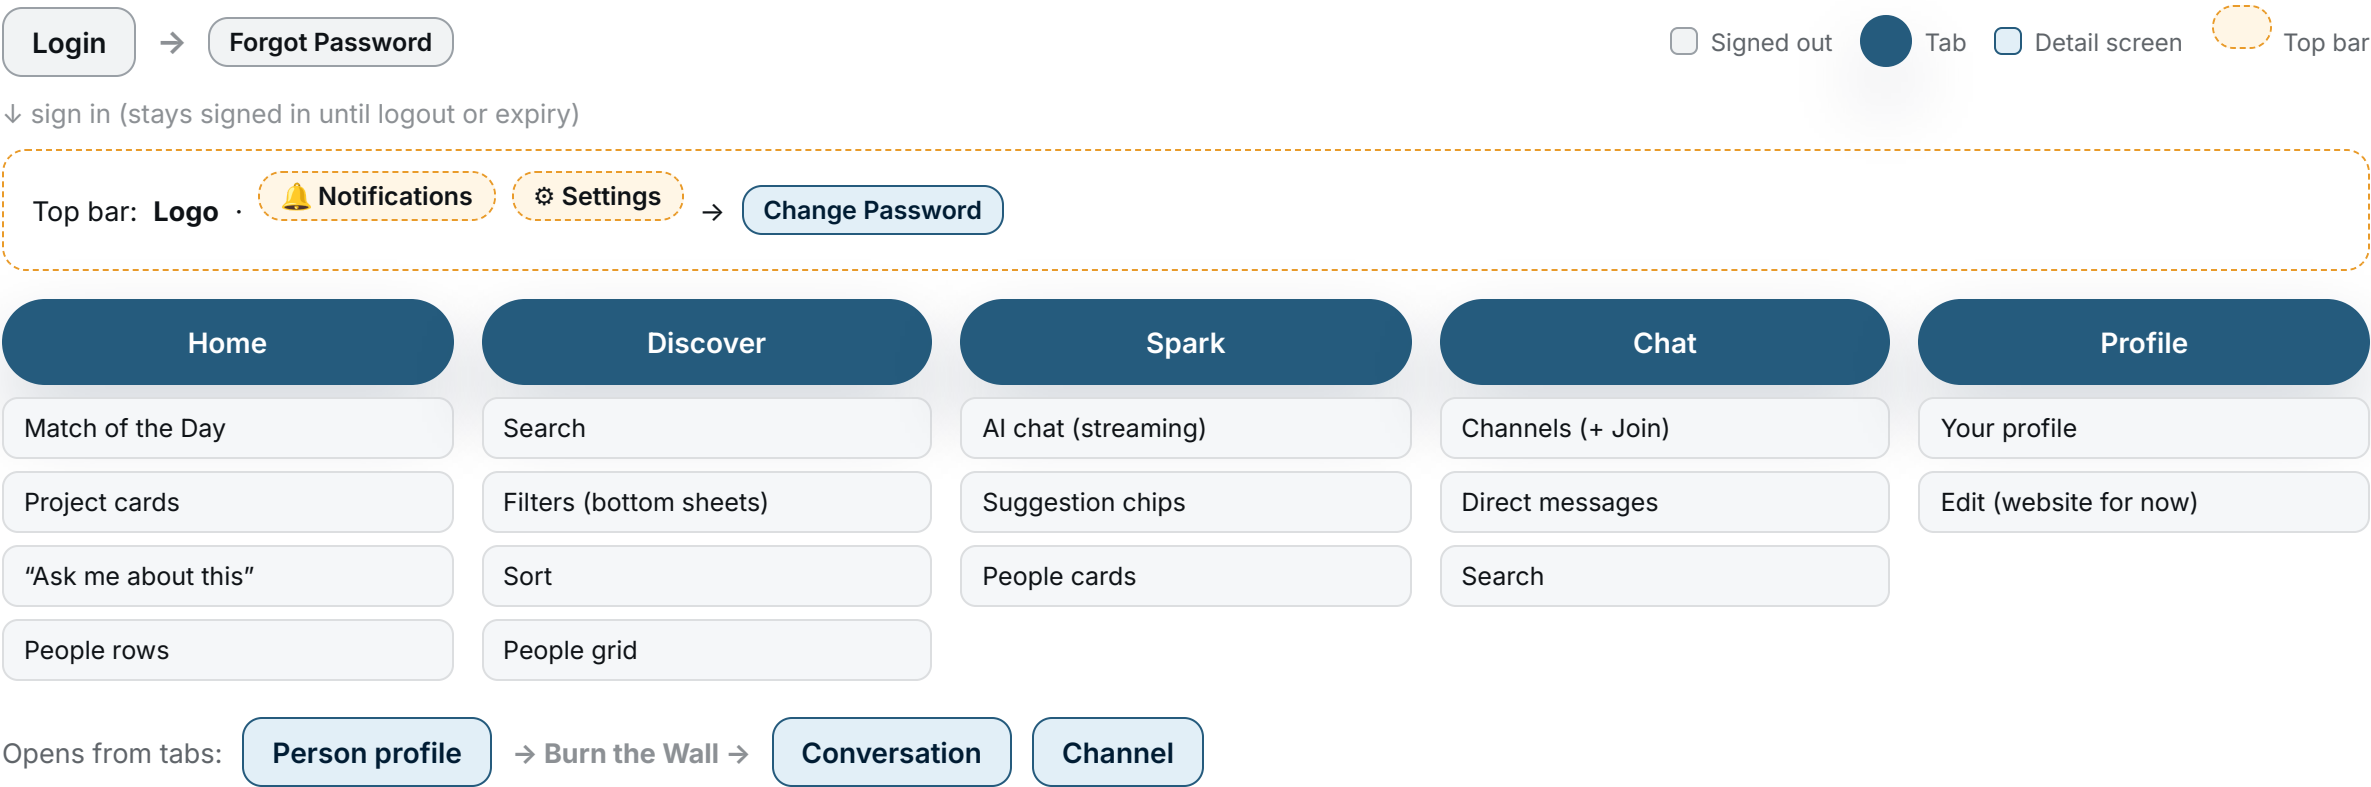

About the screenshots. They are rendered from the app's own code at an Android phone screen size (412 × 915 dp) using **fictional demo people and messages**, so no real member data appears. The phone frame and status bar are illustrative.

Decisions requested

- ☐ Navigation: bottom tab bar (Home, Discover, Spark, Chat, Profile) instead of the website's side menu
- ☐ Visual style: Connectoo brand on the Icebreaker colour tokens, fiery "Burn the Wall" CTA, Inter font, light + dark themes
- ☐ Screen layouts and content as shown
- ☐ Mobile-specific patterns: bottom-sheet filters, full-screen profile with sticky actions
- ☐ Scope of the first release vs. Phase 2 (page 27)

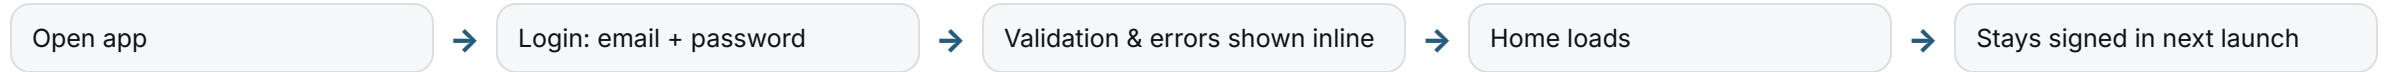

App structure & navigation

Five tabs at the bottom for one-handed use. Notifications and Settings live in the top bar. Detail screens open on top of the tabs and close with the Android back button.

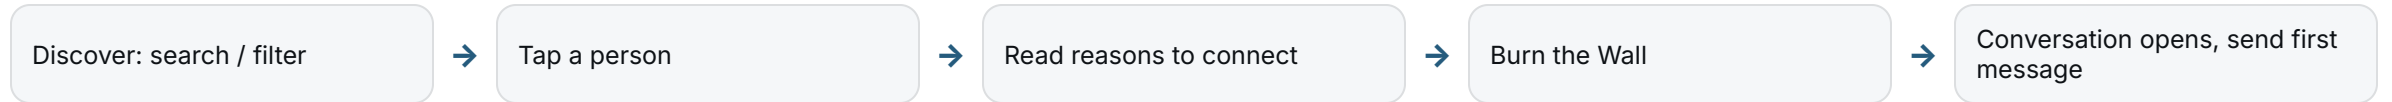

Key user flows

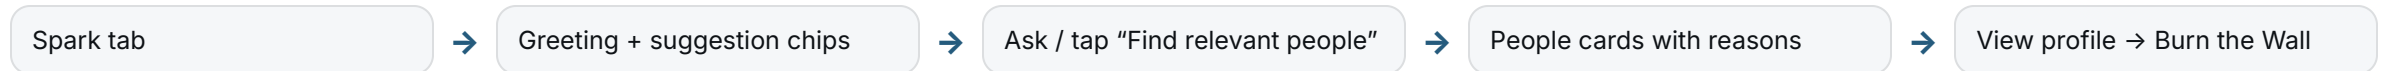

1 • Sign in

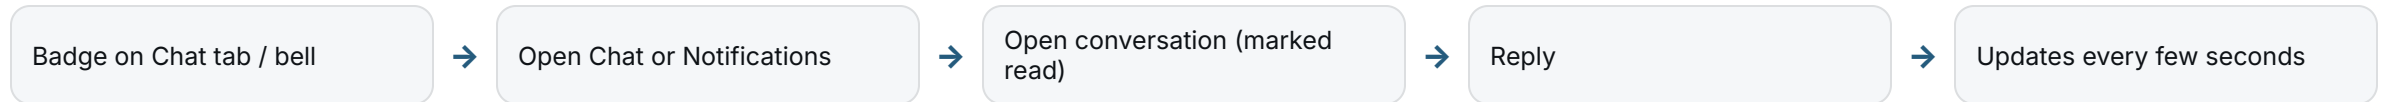

2 • Meet someone new

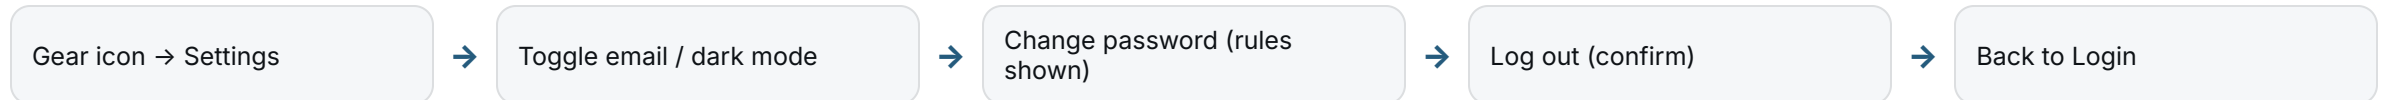

3 • Get help from Spark

4 • Stay on top of messages

5 • Account

Design system

Colour (light · dark)

		Brand blue #255b7d · #2fb5d8
		Navy #001c33 · #000c1a
		Ice #2fb5d8 · #12cbf5
		Surface #ffffff · #070e16
		Surface 2 #f5f7f9 · #0f171f
		Text #0e1216 · #eceff2
		Text secondary #5f6469 · #9b9fa3
		Border #dcdee0 · #282f35
		Success / active #2f9f3d · #4db956
		Error #cc272e · #f14d4c

Taken from the Icebreaker website's own colour tokens so the app matches the brand.

Typography: Inter

Display 28

Title 20

Heading 17

Body 15: messages, profile text

Label 14: chips, small buttons

Caption 13: times, meta

OVERLINE 12: SECTION LABELS

Text grows with the phone's font-size setting (capped at 1.6×).

Hi Alex! 🙌

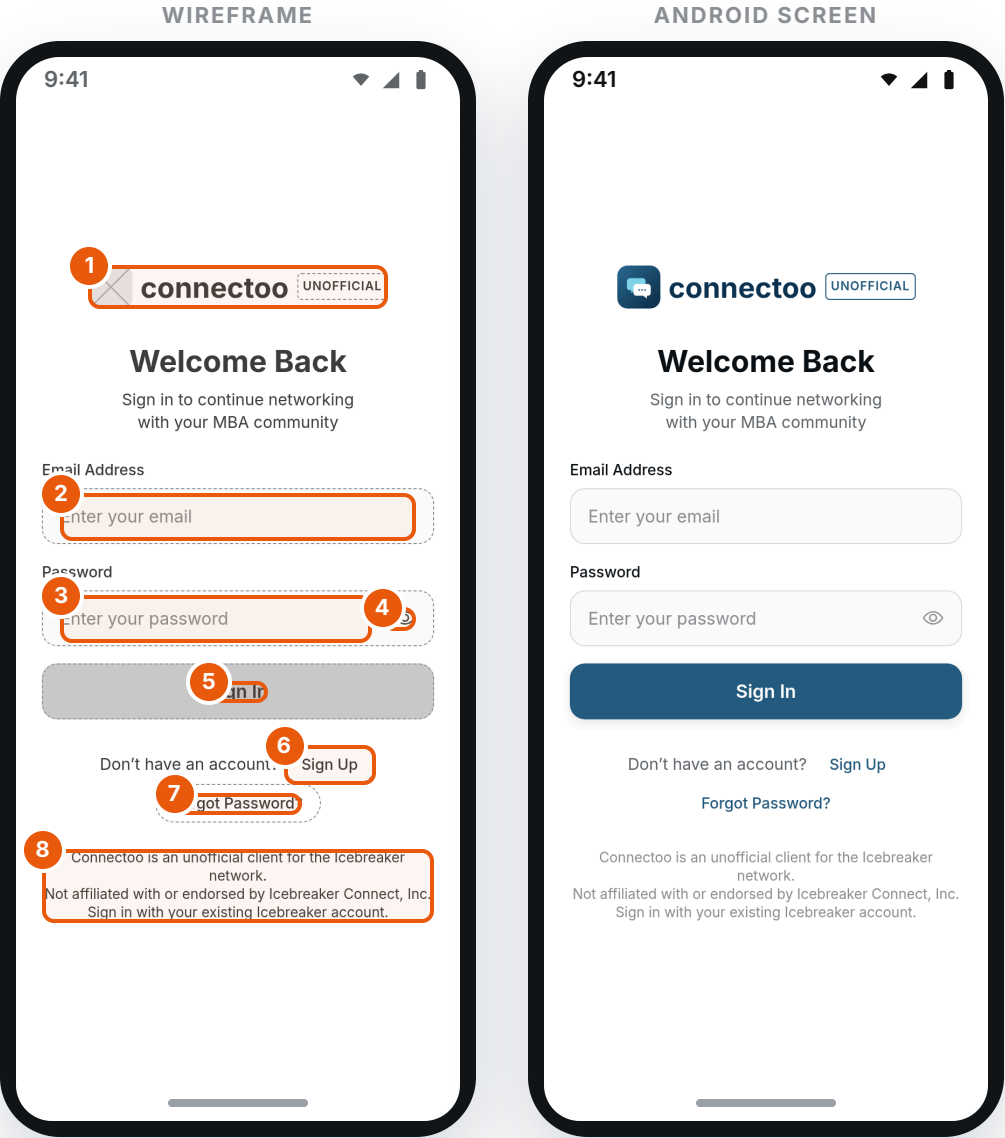

Great to connect!

Layout rules

- 4-pt spacing; 16 dp screen margins
- Touch targets ≥ 48 dp
- Cards 18 dp radius, inputs/buttons 14 dp
- Content max-width 720 dp on tablets/Chromebooks
- Discover grid: 3 / 4 / 6 columns by screen width

Website → Android: what changed and why

Website	Android app	Why
Hamburger side menu + top icons	Bottom tab bar: Home, Discover, Spark, Chat, Profile; bell & gear in top bar	Reachable with one thumb; standard Android pattern; unread badge always visible
Dropdown filter menus	Bottom sheets with search, checkboxes, Apply/Clear	Large touch targets; works with Android back
Profile pop-up modal	Full-screen profile with sticky Save / Burn the Wall bar	More room to read; primary action always in reach
Cookie login session	Secure token stored in Android Keystore; silent renewal	Stay signed in safely; password never stored
Desktop-width grids	3-column grid on phones (4 tablet, 6 Chromebook)	Readable names and tappable photos at every size
Hover states	Pressed states, pull-to-refresh, swipeable carousels	Touch-first interaction
Browser offline = blank page	Offline banner, cached data stays visible, automatic retries	Mobile networks drop often

Sign in with an existing Icebreaker account.

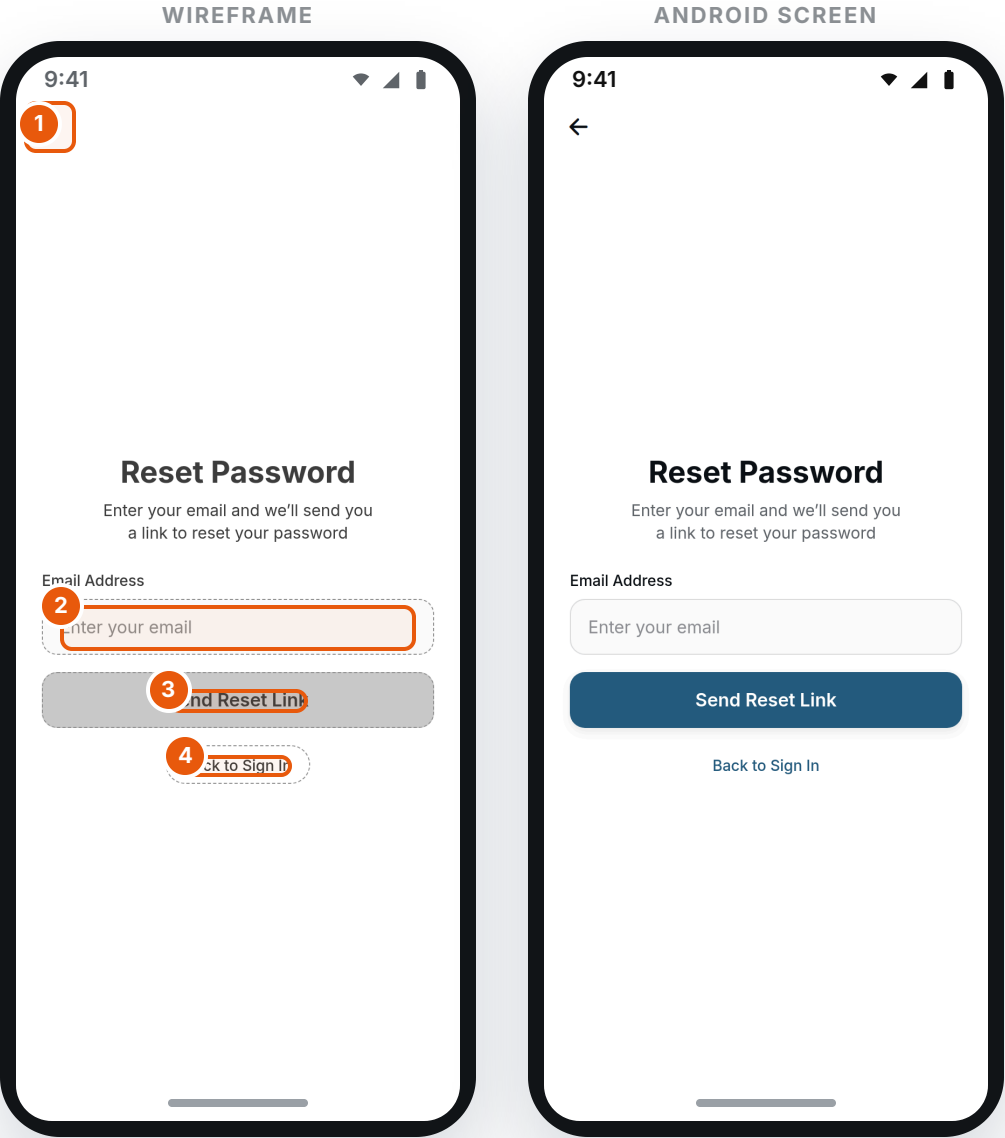

- 1 Wordmark**
App icon + “connectoo” + UNOFFICIAL tag (an unofficial client, not affiliated with Icebreaker).
- 2 Email field**
Email keyboard, autofill, inline validation.
- 3 Password field**
Masked input; returns “Go” to submit.
- 4 Show / hide password**
Eye toggle reveals or hides the password.
- 5 Sign In button**
Validates, then signs in; shows a spinner while loading.
- 6 Sign Up link**
Opens sign-up on the website in an in-app browser.
- 7 Forgot Password**
Opens the reset-password screen.
- 8 Disclaimer**
States the app is unofficial and not affiliated with Icebreaker.

Data	Sign-in service; session tokens stored in the Android Keystore (SecureStore)
Navigation	Success → Home · Forgot Password → Reset · Sign Up → website
States	Empty fields, invalid email, wrong password, no connection, session-expired notice

SCREEN 02

Forgot Password

/forgot-password

Request a password-reset email.

- 1

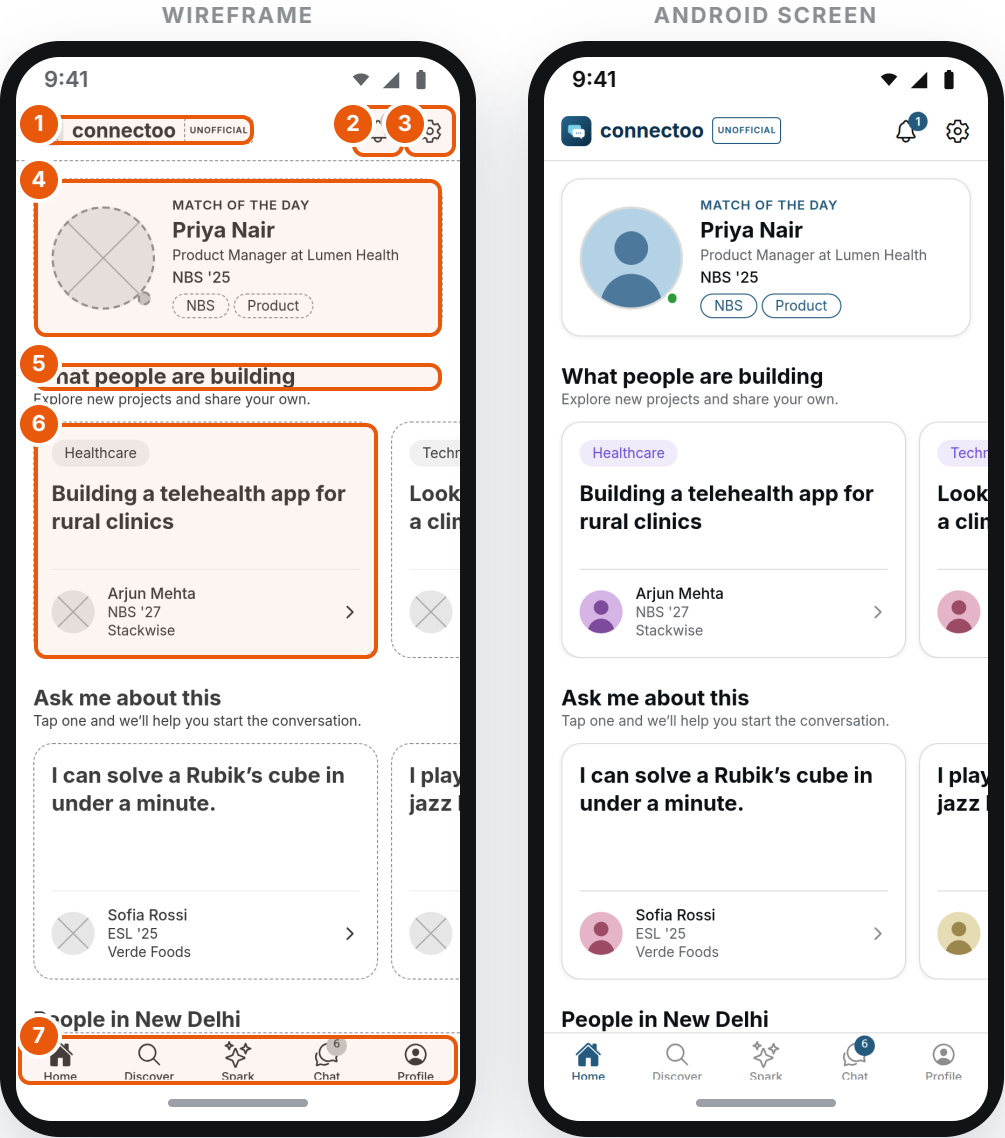

Back
Returns to Login (also Android back).
- 2

Email field
Validated before sending.
- 3

Send Reset Link
Sends a reset link, then shows a confirmation.
- 4

Back to Sign In
Secondary way back to Login.

Data	Password-reset service
Navigation	Back → Login
States	Invalid email, sending, "link sent" confirmation

Personalised starting point: daily match and curated rows of people and projects.

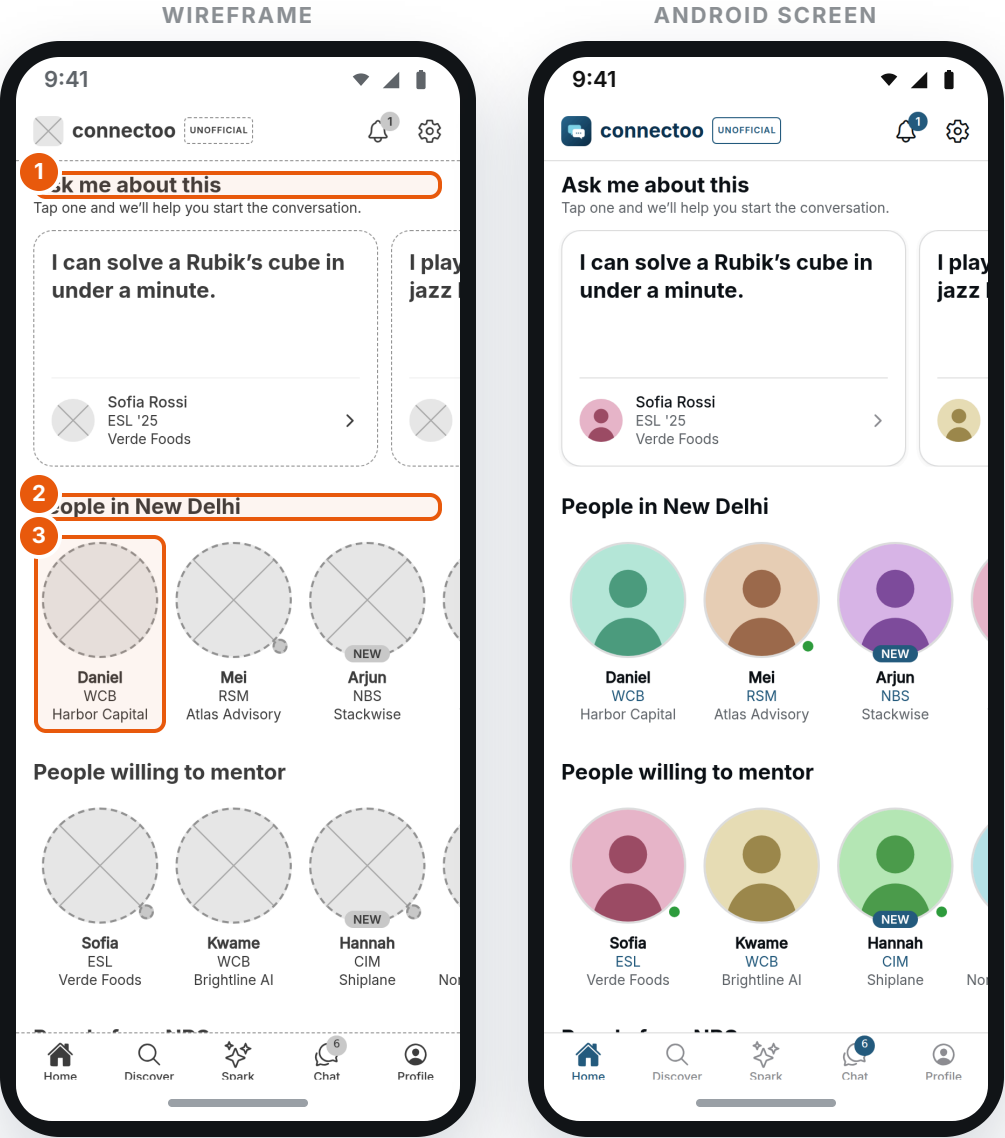

- 1 App bar**
Logo; stays on every tab.
- 2 Notifications bell**
Badge shows unread count (refreshed every 30 s). Opens Notifications.
- 3 Settings**
Opens Settings.
- 4 Match of the Day**
Daily recommended person with shared context pills. Tap → profile.
- 5 Carousel section header**
Title + subtitle for each carousel in the home feed.
- 6 Project card**
Swipe horizontally (snaps per card). Tap → that person's profile.
- 7 Bottom navigation**
Home · Discover · Spark · Chat (unread badge) · Profile.

Data	Personalised home feed (cached 5 min, pull-to-refresh)
Navigation	Any card or tile → Person profile · Bell → Notifications · Gear → Settings
States	Loading, error with retry, empty

SCREEN 04

Home — people rows

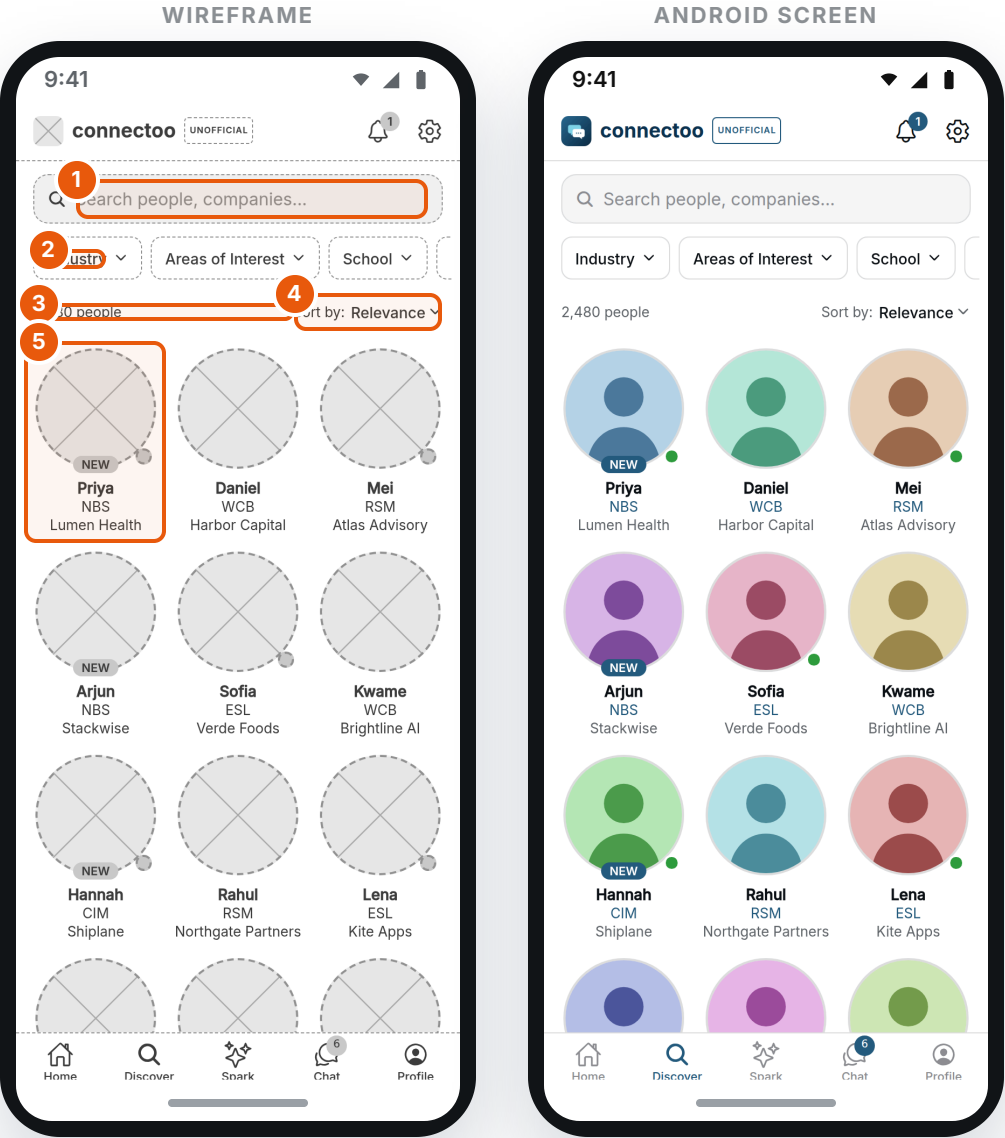

/ (scrolled)

Horizontal rows of recommended people grouped by context (location, mentors, school, goals).

- 1 “Ask me about this” cards
- Fun facts from members to start a conversation. Tap → profile.
- 2 People carousel
- Personalised rows (location, mentors, school, goals...).
- 3 Profile tile
- Photo, first name, school (blue), company. Green dot = recently active; NEW pill = new member.

Data	Personalised home feed
Navigation	Tile → Person profile
States	Rows hide when empty

Search and filter the whole member directory.

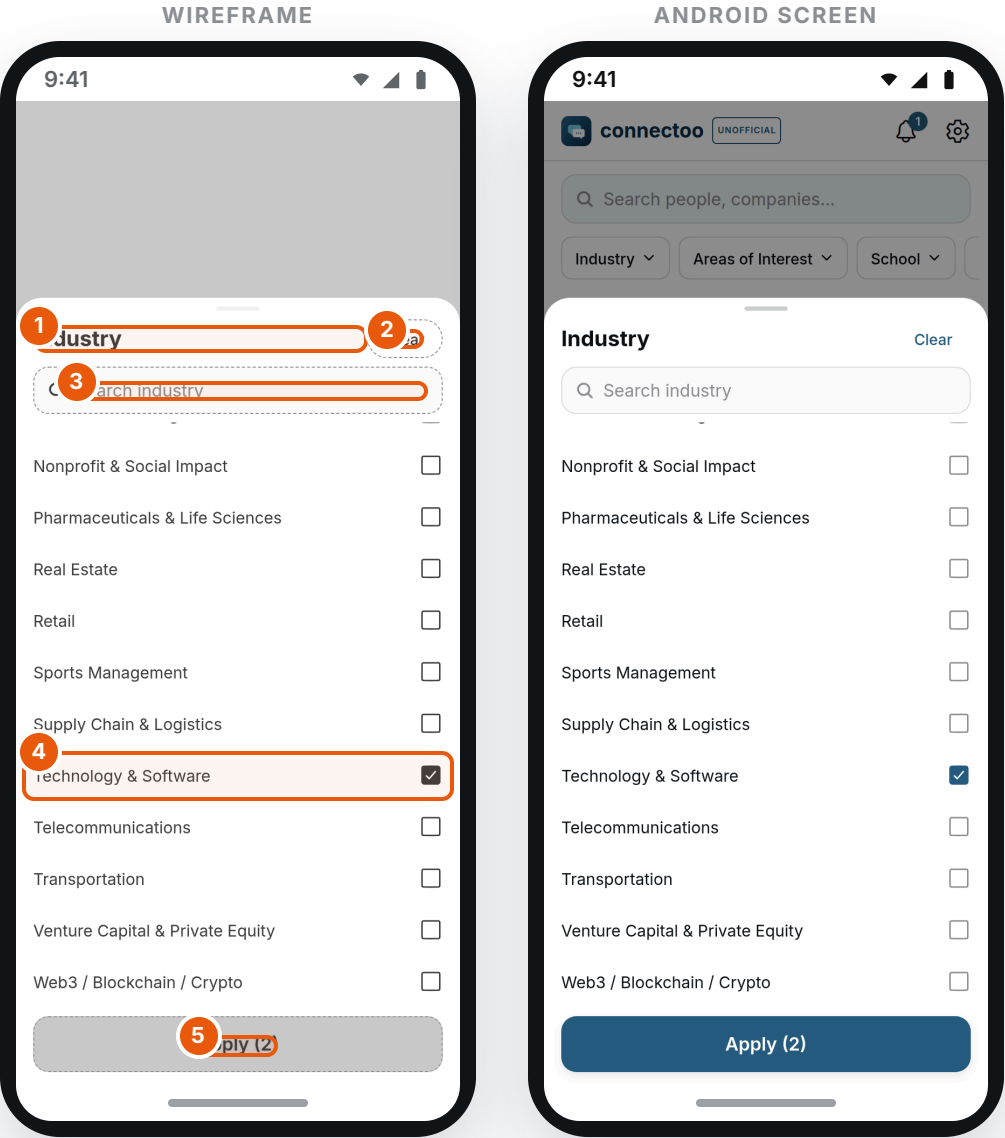

- 1 Search**
Searches names, companies and titles (debounced 350 ms).
- 2 Filter chips**
Industry, Areas of Interest, School, Goals, Advice They Can Give. Scroll sideways.
- 3 Result count**
Total matches for the current search/filters.
- 4 Sort**
Relevance or Newest.
- 5 Person tile**
3-column grid on phones (4 on tablets, 6 on Chromebooks). Infinite scroll loads 50 at a time. Tap → profile.

Data	People search (50 per page, infinite scroll)
Navigation	Tile → Person profile · Filter chip → filter sheet
States	Loading, no results, error with retry

SCREEN 06

Discover — filter sheet

/discover (sheet)

Choose one or more values for a filter (mobile replacement for the website dropdowns).

- 1

Sheet title

Bottom sheet replaces the website's dropdown; drag handle; Android back closes it.
- 2

Clear

Unselects all values in this filter.
- 3

Search within options

Shown for long lists (Industry, School).
- 4

Multi-select option

Checkbox rows, 48 dp touch targets.
- 5

Apply

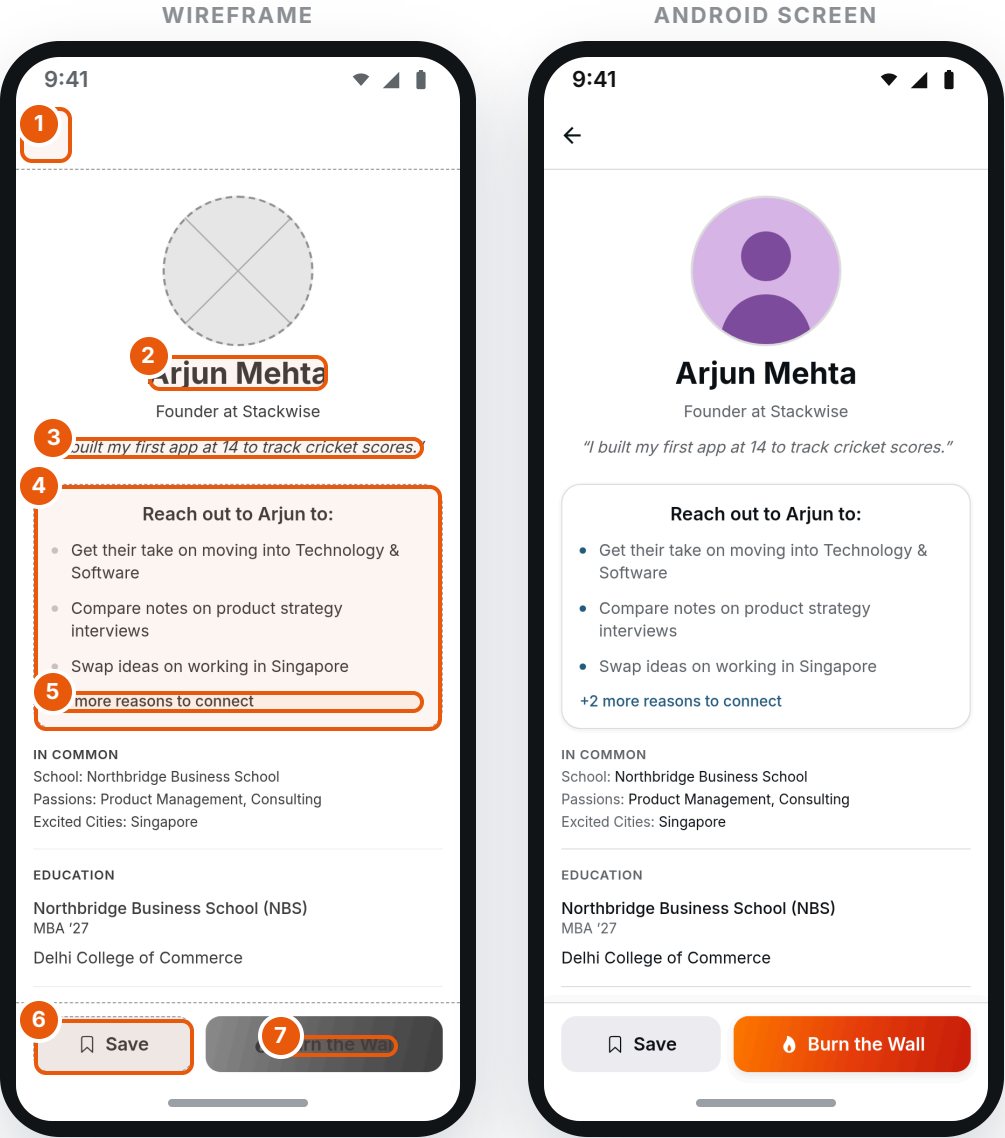

Applies and shows the count on the chip (e.g. "Industry · 2").

Data	Shared option lists (industries, goals, schools...)
Navigation	Apply → results refresh · Back/backdrop → close
States	Searchable for long lists

SCREEN 07

Person profile

/person/[id]

Decide whether to reach out: who they are, why connect, what you share.

- 1

Back
Returns to the previous screen (also Android back).
- 2

Photo & name
Large photo with activity dot, name, title at company.
- 3

Profile quote
The member's own conversation starter.
- 4

Reasons to connect
AI-generated reasons to connect, based on both profiles.
- 5

Expand reasons
Shows all reasons.
- 6

Save
Adds to / removes from saved profiles.
- 7

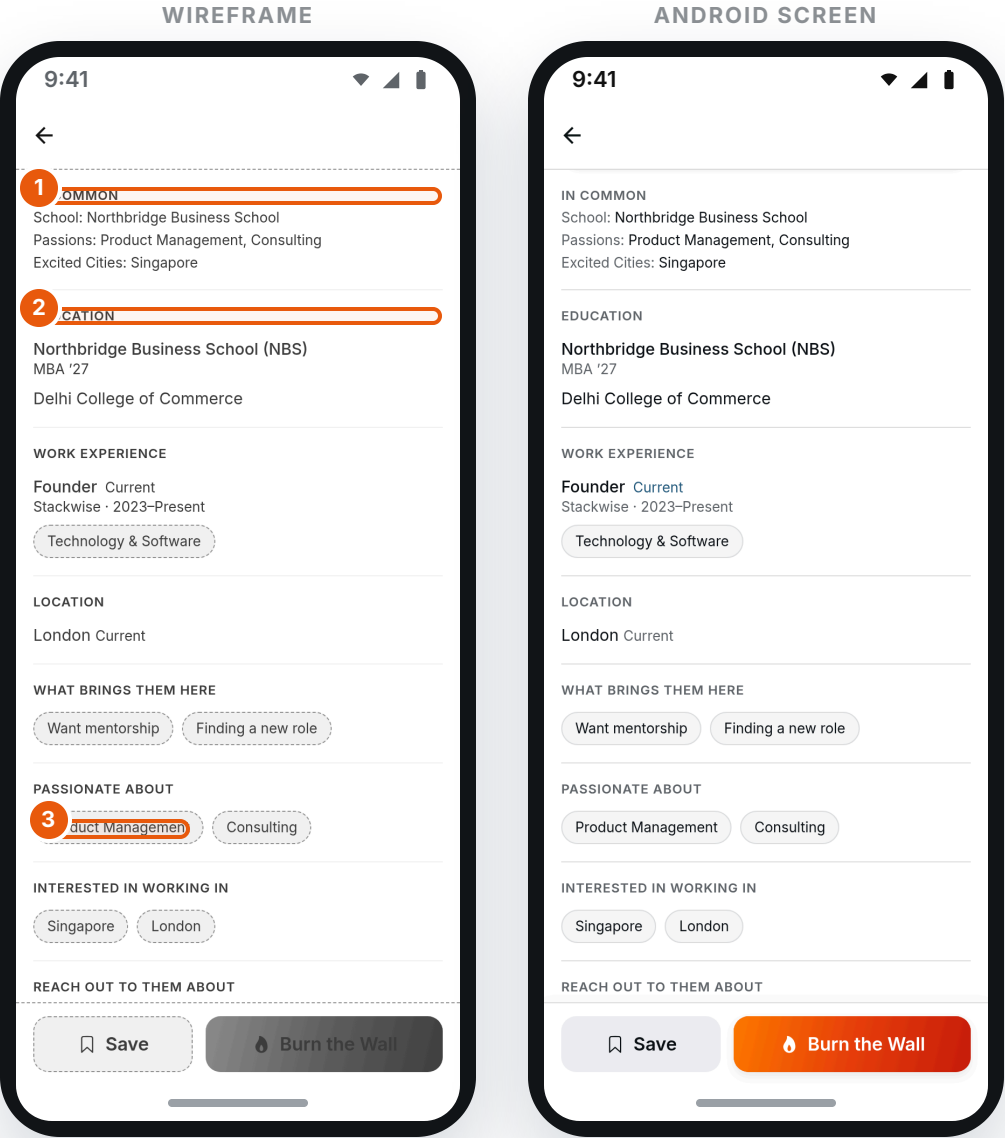

Burn the Wall / Message
Fiery orange-red call to action: opens the existing chat or creates one.

Data	Member profile, reasons to connect, saved profiles
Navigation	Burn the Wall → Conversation · Back → previous screen
States	Loading, error, can't-message (button disabled)

SCREEN 08

Person profile — details

/person/[id] (scrolled)

Full profile: education, experience, location, goals, passions, cities, advice, background, hobbies.

- 1

In common

Shared school, passions, cities.
- 2

Profile sections

Education, Work experience, Location, Goals, Passions, Cities, Advice they give, Background, Hobbies.
- 3

Tag chips

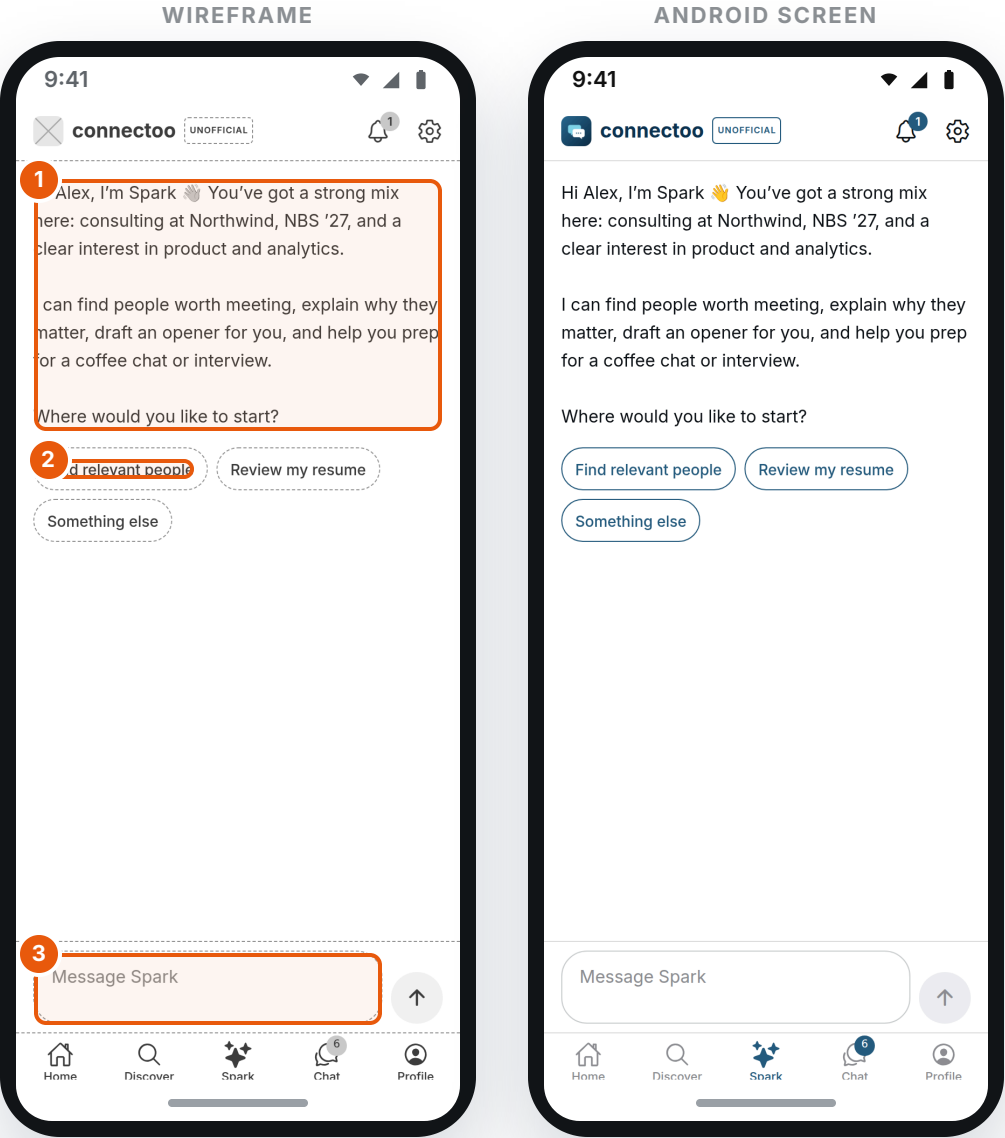

Option values shown with their display labels.

Data	Same as above
Navigation	Sticky action bar stays visible while scrolling
States	—

SCREEN 09

Spark — AI assistant

/spark (Spark tab)

Conversational assistant that finds people, explains why, drafts openers and preps chats.

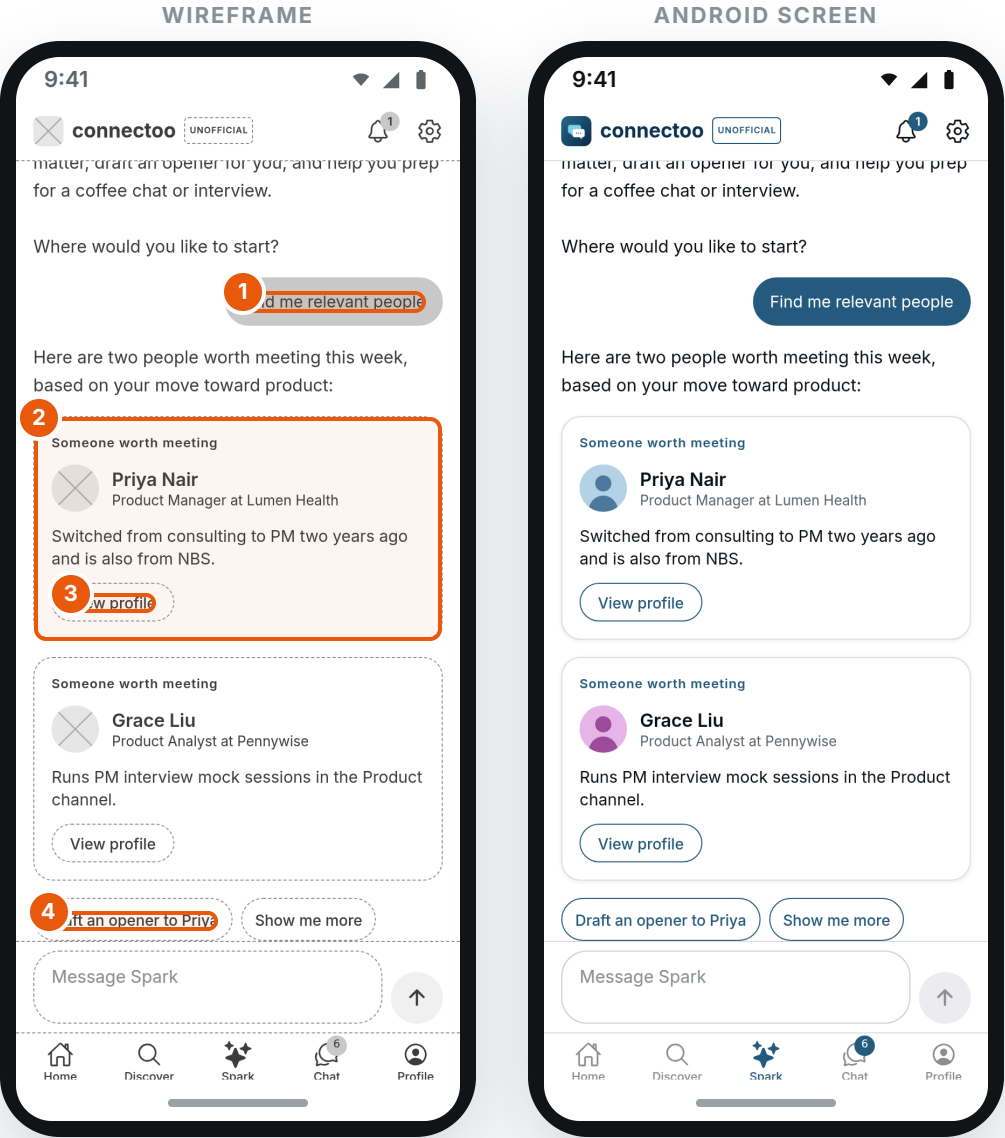

- 1 Assistant message**
Streams in word by word (Server-Sent Events). Selectable text.
- 2 Suggestion chips**
One-tap prompts suggested by Spark.
- 3 Composer**
Free-text message; send button activates when text is entered.

Data	Spark history + streaming chat (Server-Sent Events)
Navigation	Chips send a prompt · Cards → Person profile
States	Thinking/working status, connection error with Retry

SCREEN 10

Spark — suggestions

/spark

Spark returns structured people cards with a reason to meet each person.

- 1

Your message

Shown as a blue bubble on the right.
- 2

Person card

Structured card from Spark with reason + View profile.
- 3

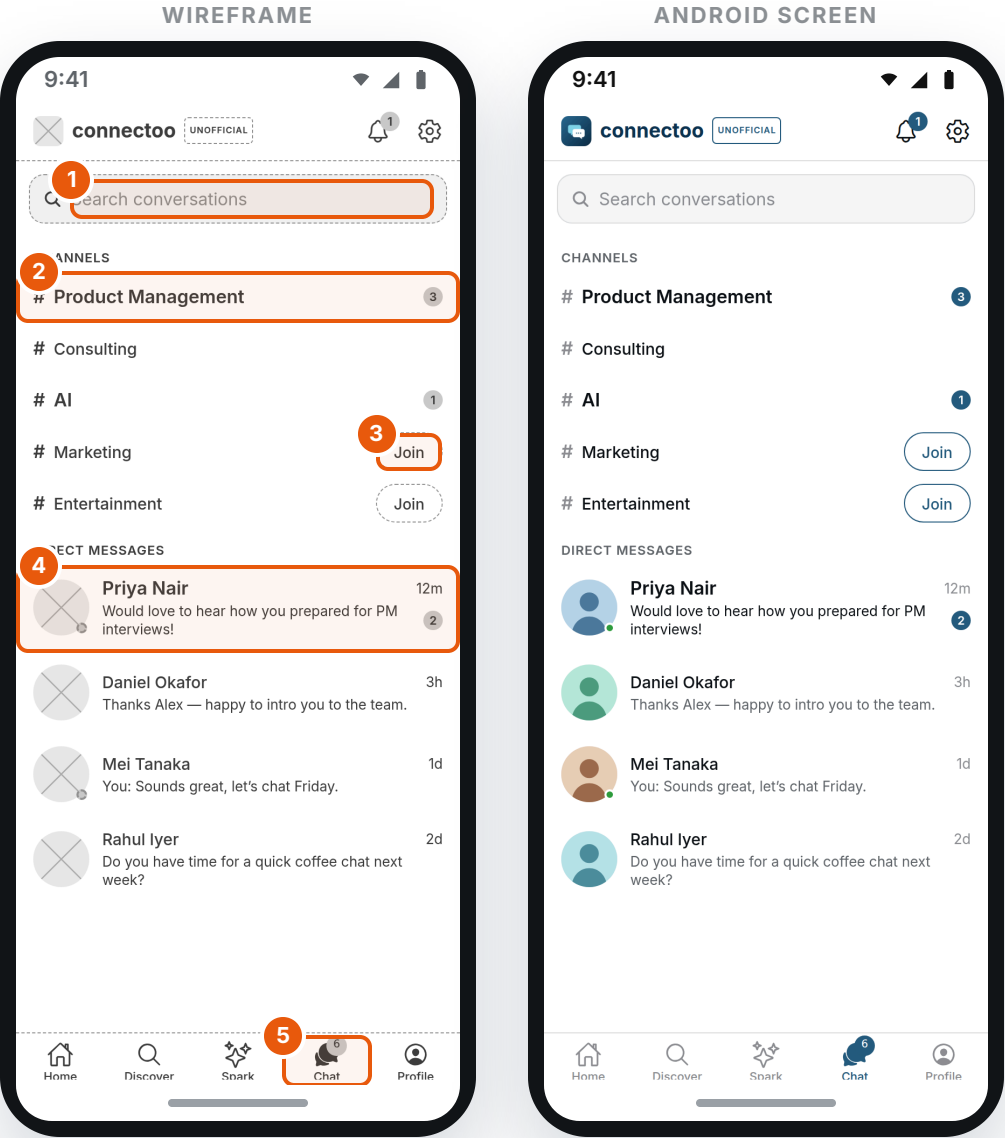

View profile

Opens the person's profile.
- 4

Follow-up chips

Next-step suggestions.

Data	Streaming chat events: text, people cards, suggestions
Navigation	View profile → Person profile
States	—

All conversations in one place: group channels and 1-to-1 messages.

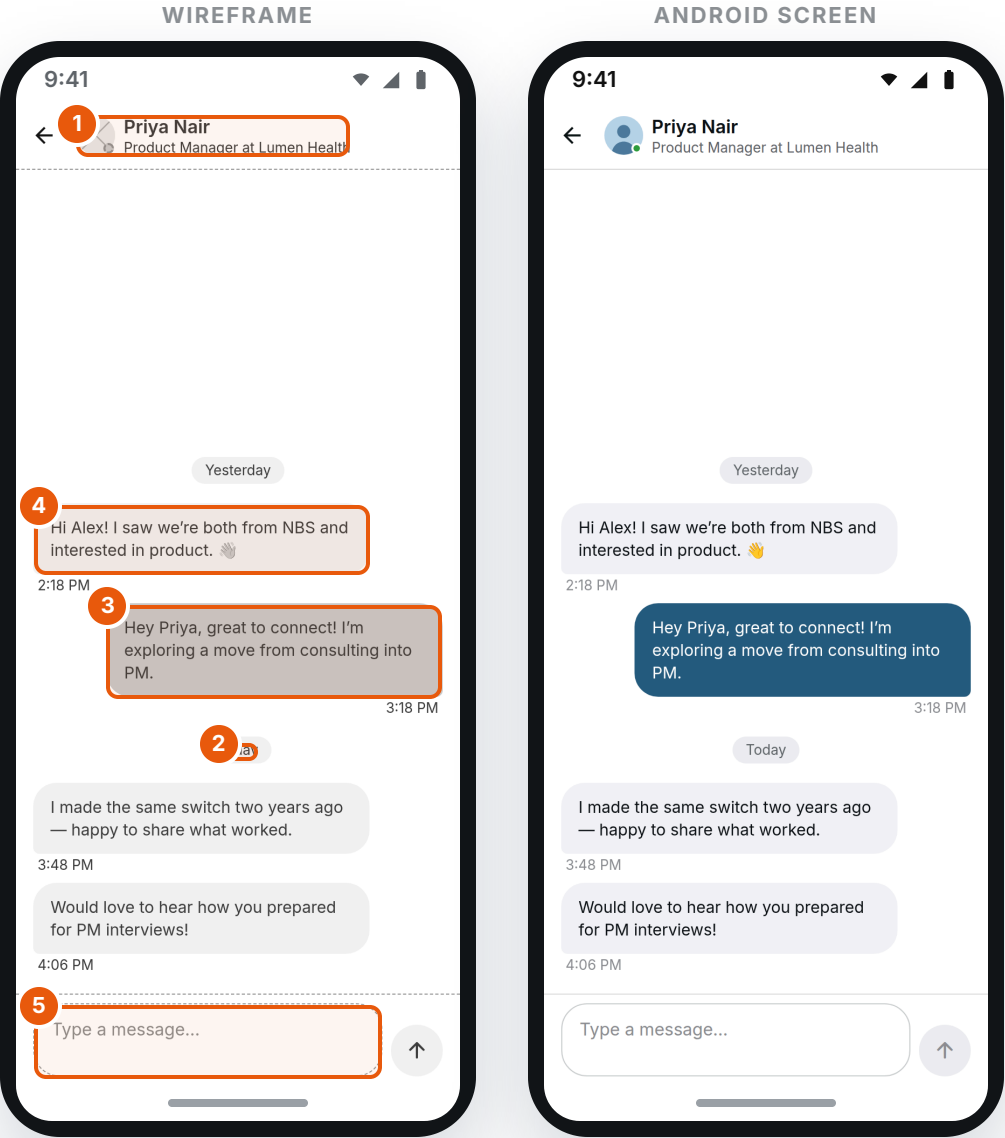

- 1 Search**
Filters channels and conversations by name or text.
- 2 Channel row**
Joined channel; bold + badge when unread. Tap → channel.
- 3 Join**
Joins a public channel.
- 4 Conversation row**
Photo with activity dot, name, last message, time, unread count. Refreshes every 30 s.
- 5 Chat tab badge**
Total unread across DMs and channels.

Data	Channels + conversations (refresh every 30 s)
Navigation	Channel → Channel · Conversation → Conversation · Join → joins channel
States	Loading, empty ("No conversations yet"), no search matches

SCREEN 12

Conversation

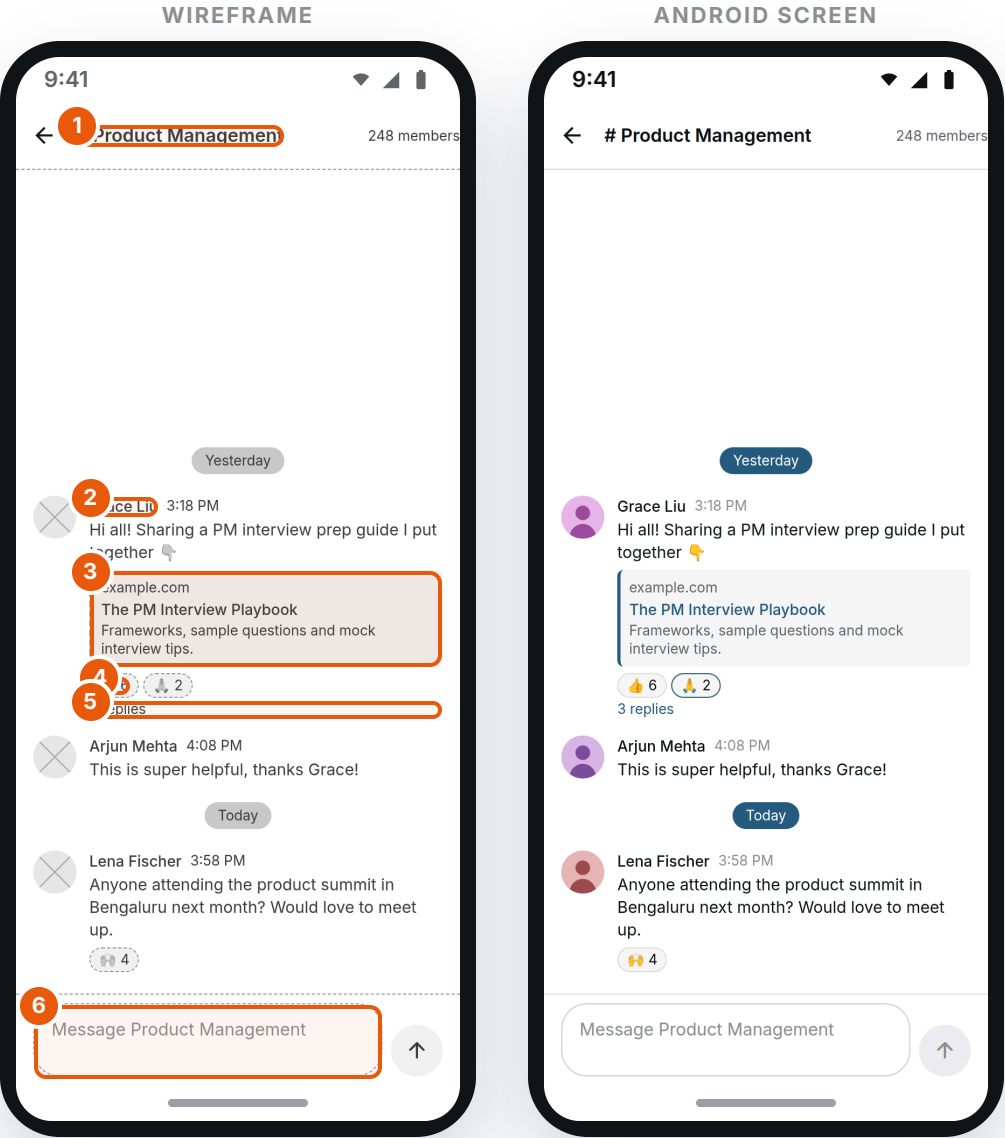

/conversation/[id]

Read and reply to a 1-to-1 conversation.

- 1 **Header**
Photo, name, title. Tap → profile.
- 2 **Day separator**
Groups messages by day.
- 3 **Your message**
Right-aligned brand-blue bubble with time.
- 4 **Their message**
Left-aligned grey bubble. New messages appear within 4 s; marked read automatically.
- 5 **Composer**
Multi-line input + send. Keeps the draft if sending fails.

Data	Messages (refresh every 4 s), send, read receipts
Navigation	Header → Person profile · Back → Chat
States	Empty ("Say hello"), send failure keeps the draft

Read and post in a group channel.

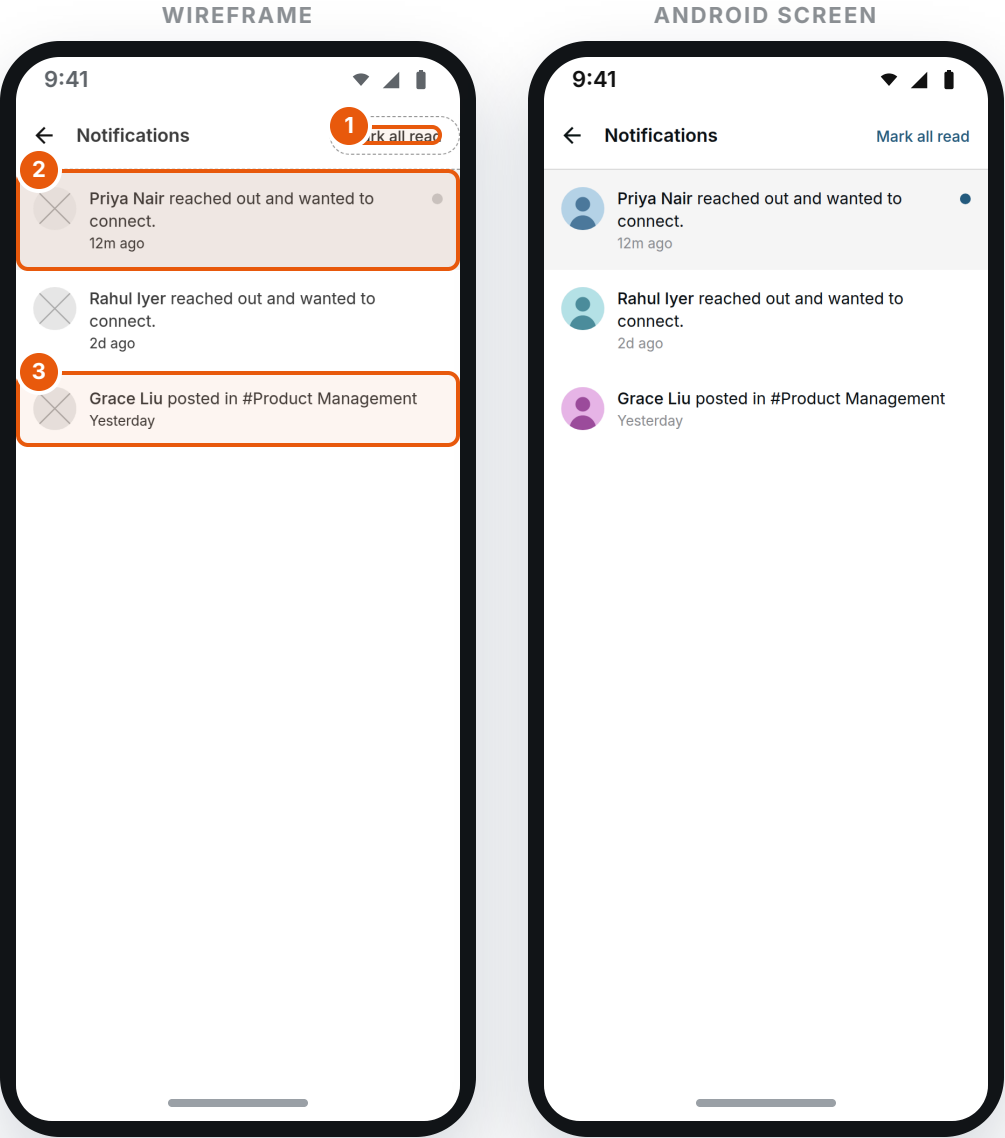

- 1 Channel header**
Name and member count.
- 2 Message**
Photo, name, time, text. Tap photo → profile.
- 3 Link preview**
Tap opens the link in an in-app browser.
- 4 Reactions**
Emoji counts; your reactions outlined in blue.
- 5 Thread count**
Replies count (thread view is planned for Phase 2).
- 6 Composer**
Post to the channel.

Data	Channel messages (refresh every 4 s), post, read state
Navigation	Photo → Person profile · Link → in-app browser
States	Empty, deleted messages shown in italics

SCREEN 14

Notifications

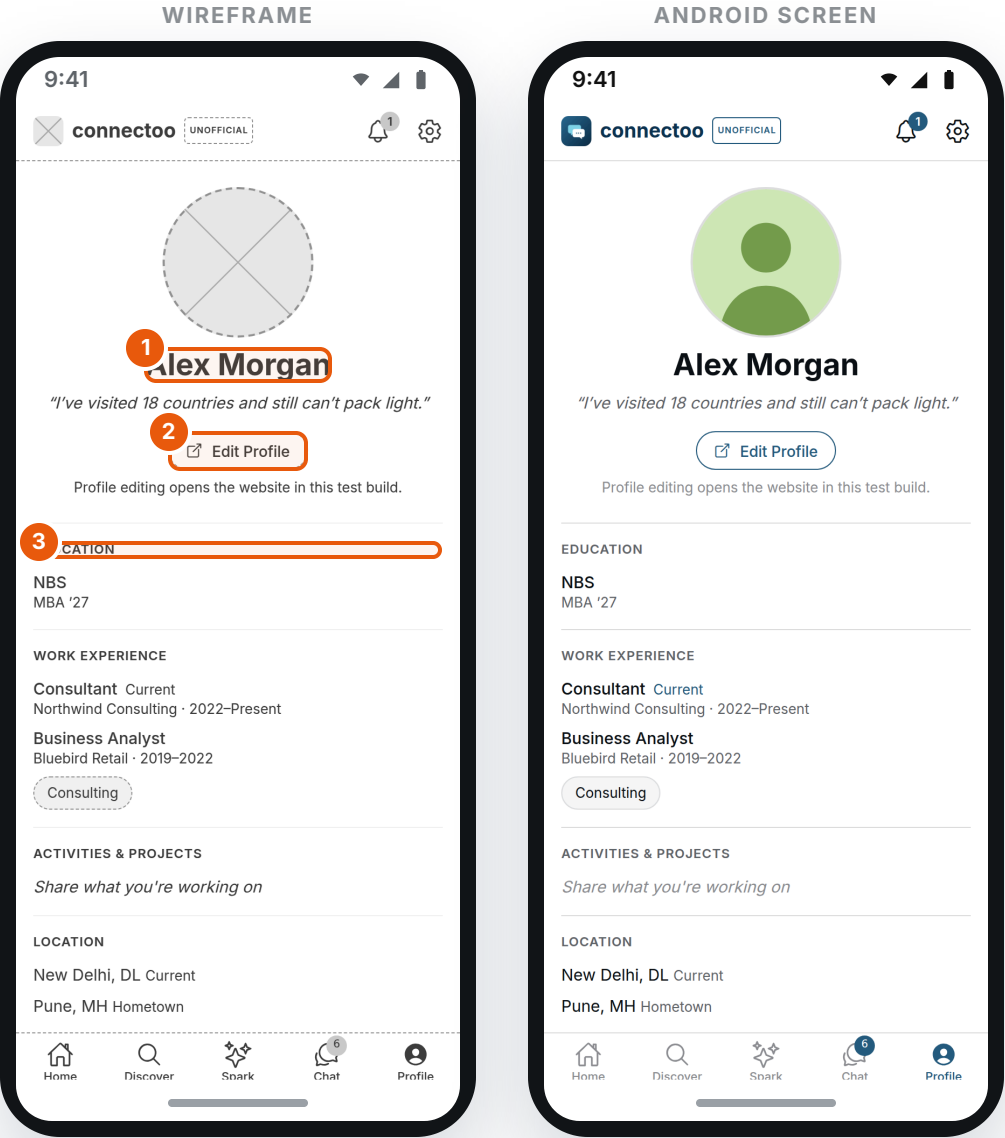

/notifications

See who reached out and other activity.

- 1 Mark all read**
Clears every unread marker.
- 2 Unread notification**
Highlighted with a blue dot. Tap → marks read and opens the conversation.
- 3 Read notification**
Normal background; relative time ("3h ago", "Yesterday").

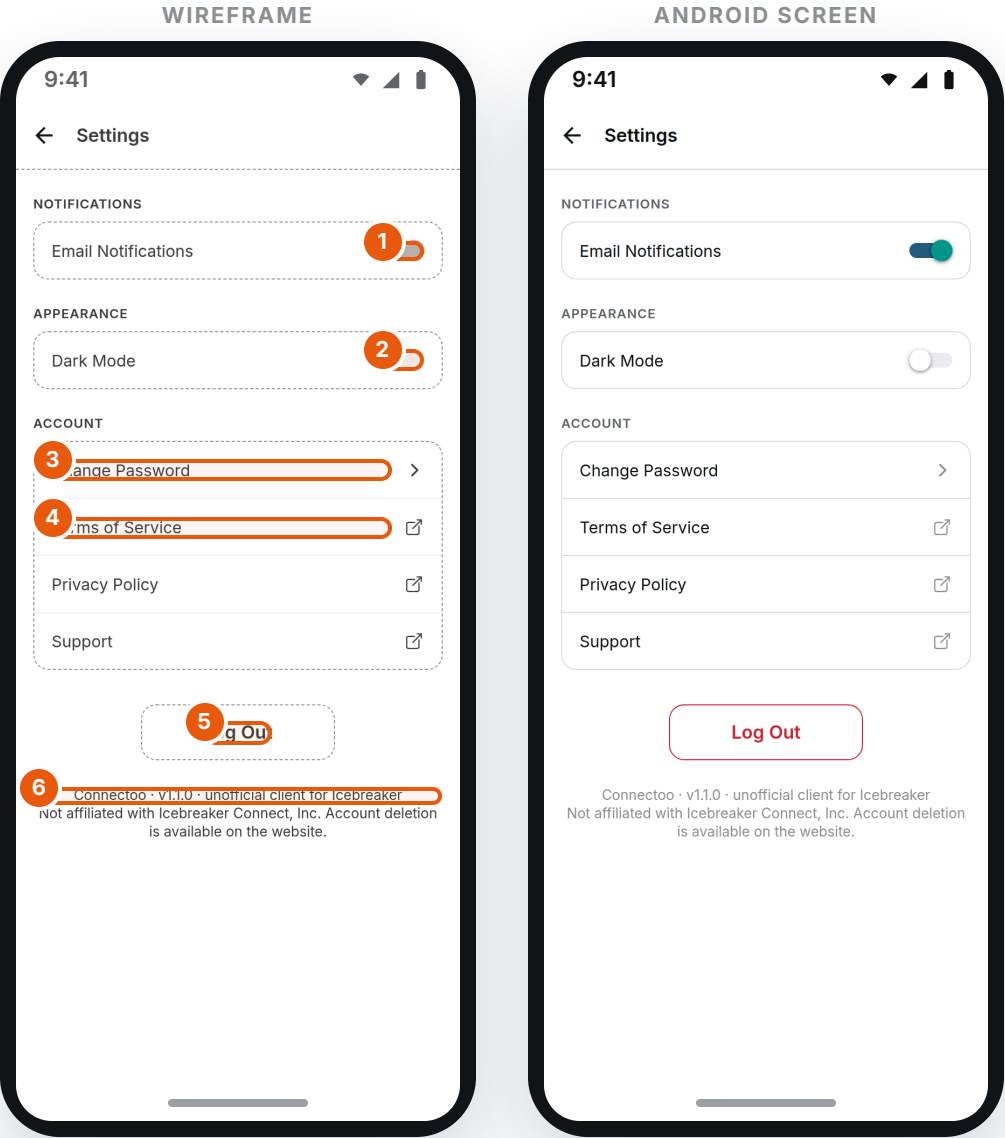

Data	Notifications (refresh every 60 s), mark read / all read
Navigation	Tap → Conversation or Person profile
States	Empty ("You're all caught up")

Your own profile as others see it.

- 1 Photo & name**
Your profile as other members see it.
- 2 Edit Profile**
Opens the website editor in this test build; native editing planned for Phase 2.
- 3 Sections**
Education, Work experience, Projects, Location, Goals, Passions, Cities, Advice, Background, Hobbies.

Data	Your profile + option labels
Navigation	Edit Profile → website (Phase 2: native editing)
States	Empty sections show hints

Account preferences, legal links and log out.

- 1 Email notifications**
Saved to the account immediately.
- 2 Dark mode**
Switches theme instantly and syncs with the website setting.
- 3 Change Password**
Opens the change-password form.
- 4 Legal & support links**
Open in an in-app browser.
- 5 Log Out**
Asks for confirmation, ends the session and returns to Login.
- 6 Version**
Build/version shown for bug reports.

Data	Account settings, sign-out
Navigation	Change Password → form · Links → in-app browser · Log Out → Login
States	Save failure shows a message

SCREEN 17

Change Password

/change-password

WIREFRAME

Change Password

ANDROID SCREEN

9:41

← Change Password

Enter your current password and choose a new one.

Current Password

New Password

Confirm New Password

At least 8 characters

One uppercase letter

One lowercase letter

One number

Change Password

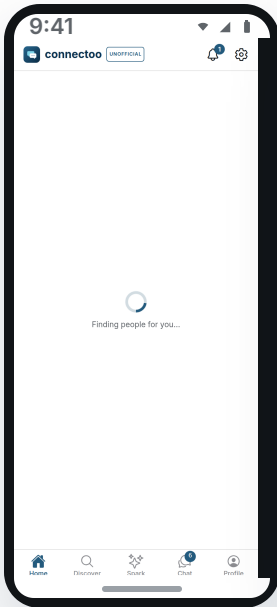

Change password with the same rules as the website.

- 1 Current password
- With show/hide toggle.
- 2 New password
- Checked live against the website's rules.
- 3 Password rules
- Turn green as each rule is met.
- 4 Submit
- Changes the password, then signs in again with the new password.

Data	Change-password service, then re-sign-in
Navigation	Success → back to Settings
States	Rules not met, wrong current password

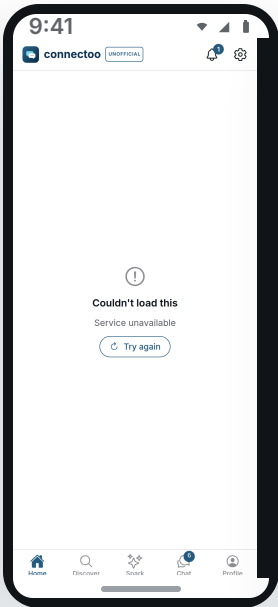

States: loading, errors, empty & offline

Every screen handles these cases so the user is never left with a blank or frozen screen.

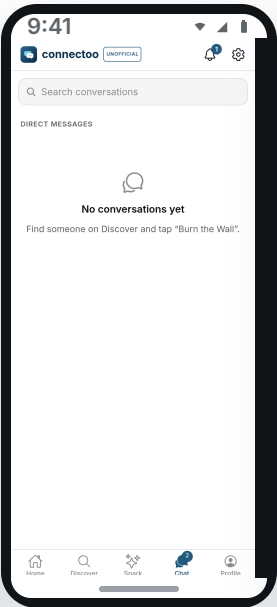

Loading

Spinner with friendly text while data loads.

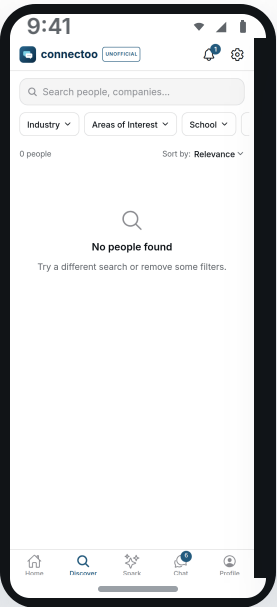

Server error

Clear message + "Try again". Requests retry automatically first.

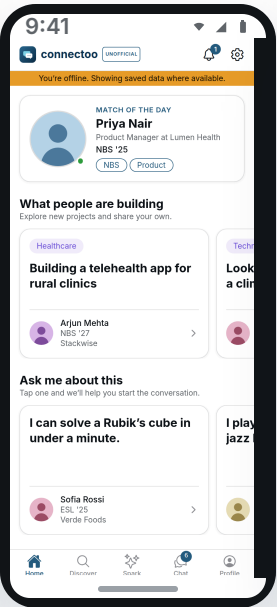

Empty chat

Guides the user to Discover to start a conversation.

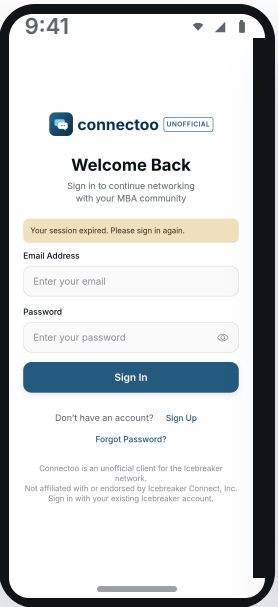

No results

Suggests changing the search or filters.

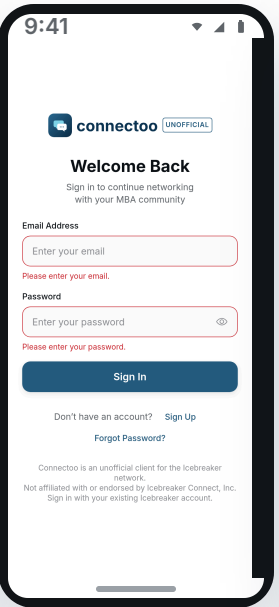

Offline

Amber banner under the app bar; cached data stays visible.

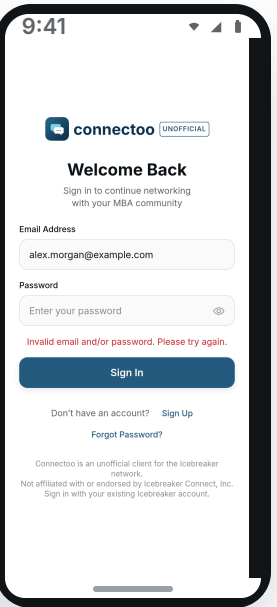

Session expired

User is returned to Login with an explanation.

Form validation

Field-level messages before anything is sent.

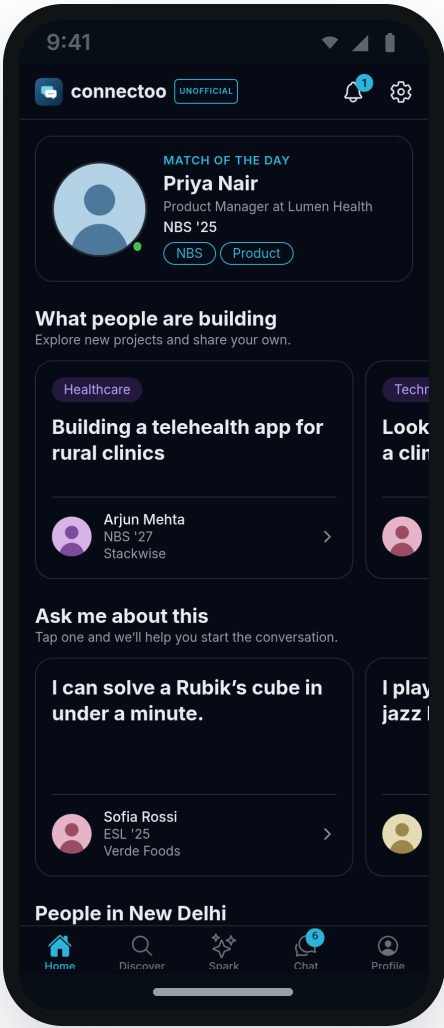

Wrong password

Same wording as the website; password field is cleared.

Dark mode

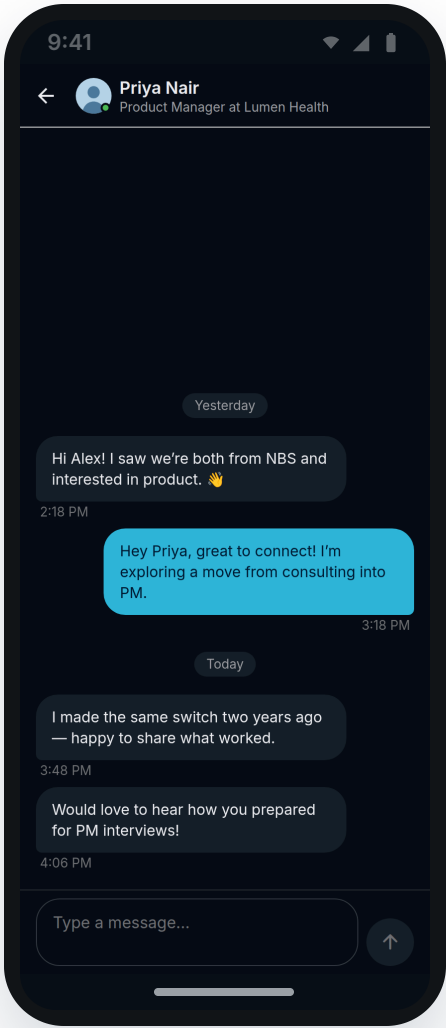

Follows the phone's setting or the toggle in Settings (syncd with the website preference). Colours come from the website's dark theme.

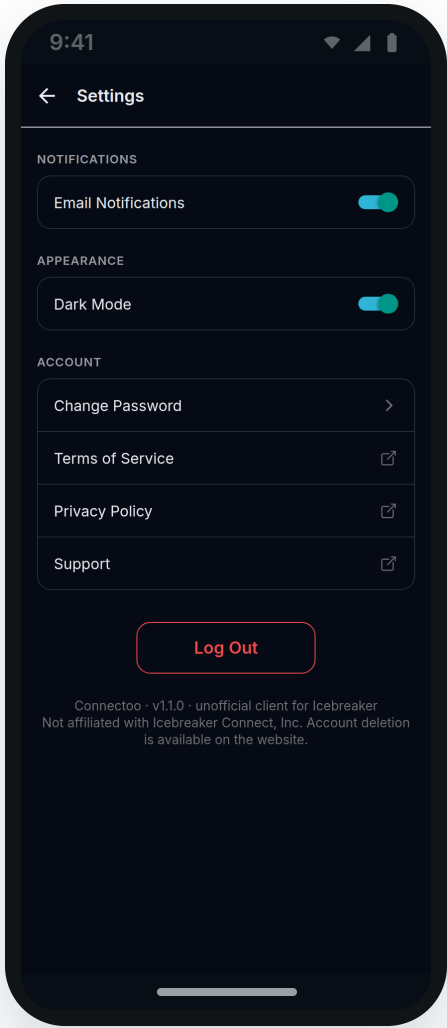

Home

Discover

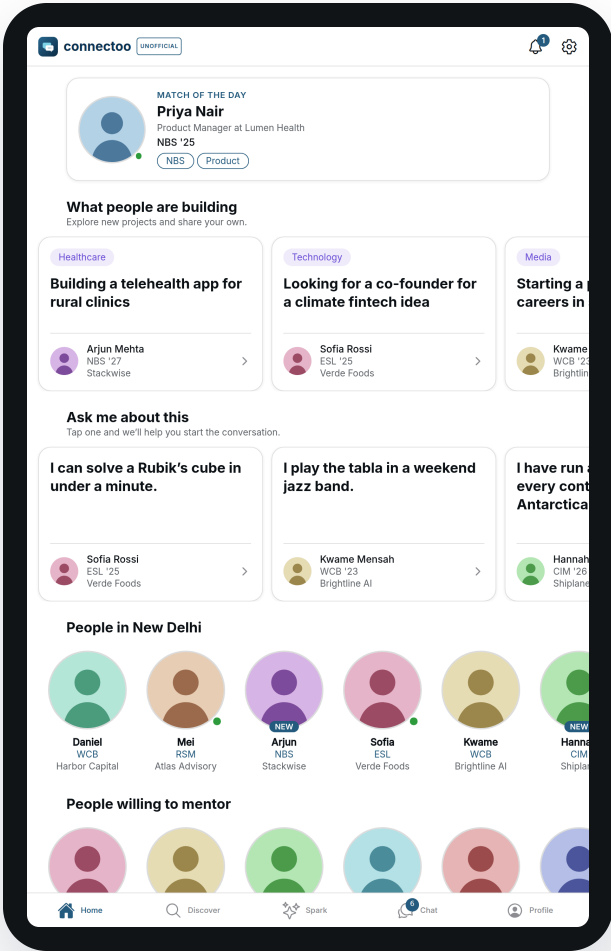

Conversation

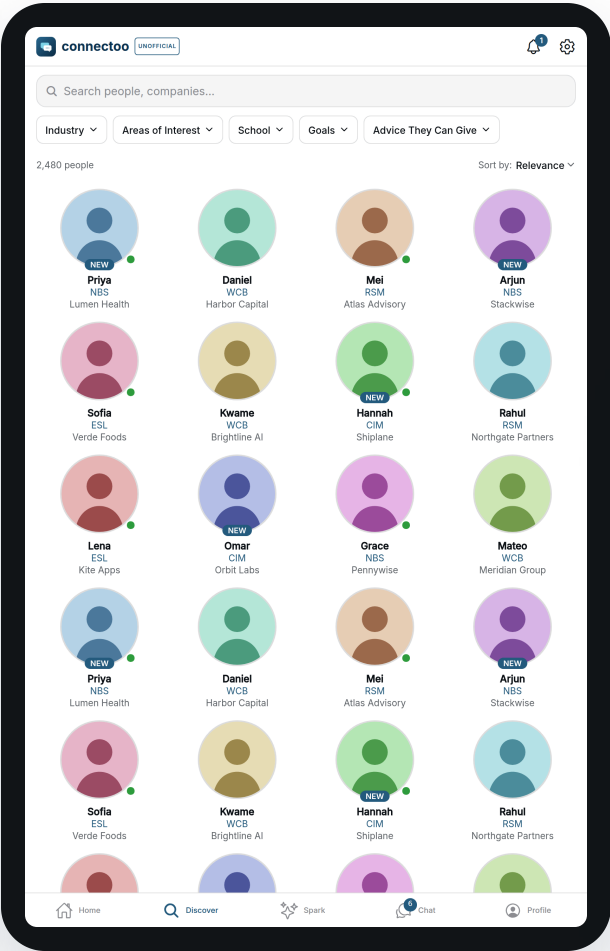

Settings

Tablets & Chromebooks

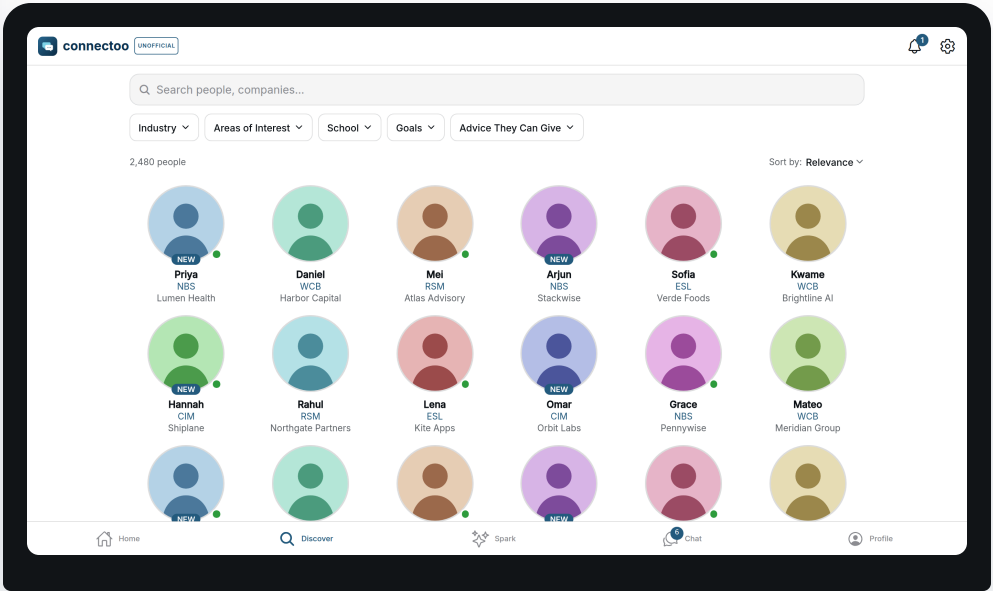

Same app, wider layouts: content is centred with a comfortable reading width and the Discover grid adds columns.

Android tablet: Home (800 × 1280)

Android tablet: Discover

Chromebook: Discover (1366 × 768)

Scope, known issues & next steps

In this build

- Login, forgot password, stay signed in, logout
- Home: match of the day, projects, icebreakers, people rows
- Discover: search, 5 filters, sort, infinite scroll
- Person profile, Save, Burn the Wall
- Chat: channels (join, read, post) and 1-to-1 messages
- Spark AI assistant with people suggestions
- Notifications, My Profile (view), Settings, change password
- Dark mode, offline handling, tablet & Chromebook layouts

Planned: Phase 2

- Push notifications
- Edit profile & photo inside the app
- Channel threads, reactions, photo/GIF posting, @mentions
- AI helpers: "Ideas to Burn the Wall" (opener ideas), "Suggest reply"
- "Interested" on projects; Location & Company filters
- Saved profiles list, block/report, delete account
- Instant Home on launch (saved feed)
- iPhone/iPad build; Play Store release

Known issues

- Home feed is slow from the server (6–14 s) and sometimes errors; the app retries and offers "Try again"
- On-device testing has just started; reported glitches will be fixed in the next build
- Test build is signed for side-loading only (not Play Store)
- Screenshots here use demo data and a browser render of the app code; small rendering differences on real phones are possible

Next steps

1. Manager review & approval of this document
2. Fix phone-test glitches + approved changes
3. Phase 2 features
4. Release build & Play Store
